

2018 MSD Building Sewer Inspection Fees Table

(Section 1809)

Feet of Pipe	251-350	350-500	501-650	651-800	801-950	951-1100	1101-1250	1251-1400
Hrs Required for Inspection (est)	1	2	3	4	5	6	7	8
Fee	\$80	\$160	\$240	\$320	\$400	\$480	\$560	\$640

- i. No inspection fee charged for Building Sewers less than 250-feet in length
- ii. Permits issued for work scheduled under 250-feet in length can be subject to a \$80 minimum charge for required subsequent visits by an MSD inspector.
- iii. For building sewers in excess of 1,400 feet, the contractor is required to submit; in writing; an estimate for the number of work hours they are expected to be working. Based upon this estimate, MSD will require an inspection fee equal to 2 hours of inspection time per eight hour shift. For example, if a licensed sewer tapper is expecting to be working for five, eight hour days, then MSD will require an inspection fee of 4 days X 2 hours per day X \$80 per hour = \$640.
- iv. MSD's inspection fee fluctuates each year based upon Section 1809 of MSD's Rules and Regulations. Currently the fee is \$80/hour.
