MSD Notice of Construction *Belt Filter Press Project at Muddy Creek Plant*

CINCINNATI – The Metropolitan Sewer District of Greater Cincinnati (MSD) will begin making improvements to the Muddy Creek Wastewater Treatment Plant (WWTP) in Cincinnati's Saylor Park neighborhood. Work is anticipated to begin in mid-January 2016 with final completion in April 2017.

The improvements include replacing the existing belt filter process with two new dewatering centrifuges, along with a polymer addition system, piping, building, pumping and storage tank modifications.

Construction will occur primarily Monday through Friday during daylight hours, depending on weather and the contractor's schedule. Work on weekends may be necessary at times. MSD's construction contractor is Dugan and Meyers Construction Company.

The Muddy Creek project is part of Project Groundwork, MSD's multi-year plan to reduce overflows into streams and rivers in Hamilton County. Project Groundwork will improve the quality of our lives through cleaner streams, improved protection of public health, and enhancement of the communities where we live, work, and play.

For additional information about the project, please contact MSD Engineering Customer Service at (513) 557-3594 or MSD.Communications@cincinnati-oh.gov
