MSD Notice of Construction

Millbrook 2 Pump Station Replacement Project

CINCINNATI – The Metropolitan Sewer District of Greater Cincinnati (MSD) will begin construction on a replacement pump station in Springfield Township later this month or early February. The work will be completed by Spring 2018.

The Millbrook 2 Pump Station replacement project includes construction of a new pump station, rerouting of an existing water line, installation of about 1,400 feet of 4-inch-diameter force main and demolition of the old pump station. The work will take place between 734 Woodfield Drive and 9581 Millbrook Drive.

Construction activities will occur primarily Monday through Friday during daylight hours, depending on the weather and the contractor's schedule. MSD's contractor is Sunesis Construction.

Typical construction-related disturbances such as noise, dirt and vibrations should be expected throughout the construction period. Access to homes and businesses will be maintained but could be temporarily delayed.

This project is part of Project Groundwork, MSD's multi-year plan to reduce sewer overflows into streams and rivers in Hamilton County. Project Groundwork will improve the quality of our lives through cleaner streams, improved protection of public health, and enhancement of the communities where we live, work, and play.

For additional information about the project, please contact MSD Engineering Customer Service at (513) 557-3594 or MSD.Communications@cincinnati-oh.gov.
