MSD Notice of Construction

Werk & Westbourne Enhanced High Rate Treatment (EHRT) Facility

Cincinnati - The Metropolitan Sewer District of Greater Cincinnati (MSD) will begin construction on the Werk & Westbourne EHRT Facility located southwest of the Werk Road and Westbourne Drive intersection in Green Township. The project consists of constructing a new enhanced high rate treatment facility which includes an approximately 8,000 square foot operations building. The facility will reduce combined sewer overflows (CSO's) into Schaible Creek, a tributary of Muddy Creek. Work is anticipated to begin in mid-August 2016 with final completion in June 2018.

Construction will occur primarily Monday through Friday during daylight hours, depending on weather and the contractor's schedule. Work on weekends may be necessary at times. MSD's construction contractor is Dugan and Meyers Construction Company.

The Werk & Westbourne EHRT Facility project is part of Project Groundwork, MSD's multi-year plan to reduce overflows into streams and rivers in Hamilton County. Project Groundwork will improve the quality of our lives through cleaner streams, improved protection of public health, and enhancement of the communities where we live, work, and play.

Although MSD will put in place a series of measures to minimize neighborhood disruptions as much as possible, some typical construction-related disturbances such as noise and dust should be expected throughout the construction period.

For additional information about the project please visit our website at www.Projectgroundwork.org/WerkWestbourne.
