MSD Construction Project Update ***CSO 127 & 128 Stream Separations (part of MSD's West Fork Project)***

The Metropolitan Sewer District of Greater Cincinnati (MSD) will begin installing new storm and sanitary sewers across West Fork Road in Northside (between Colerain and Montana avenues) during the week of June 22nd, *pending weather and the contractor's schedule*.

The project will allow stormwater runoff from the Mt. Airy Forest and West Fork Road to be discharged directly to the West Fork Channel. This effort is part of MSD's West Fork Project to reduce combined sewer overflows (CSOs) into the West Fork Channel, a tributary of the Mill Creek.

Work is anticipated to be completed by August 2015.

Construction will occur primarily Monday through Friday between 7 a.m. and 5 p.m., *pending on weather and the contractor's schedule*. Work on Saturdays may be necessary at times. MSD's construction contractor is Sunesis Construction.

West Fork Road will be down to one lane in two specific areas at separate times during the construction – the first crossing is adjacent to the CRC recreational ballfield area in the 1600 block of West Fork Road and the second crossing is adjacent to 1783 West Fork Road. Flaggers will be used to control traffic in each area.

The West Fork Project is part of Project Groundwork, MSD's multi-year plan to reduce sewer overflows into streams and rivers in Hamilton County. Project Groundwork will improve the quality of our lives through cleaner streams, improved protection of public health, and enhancement of the communities where we live, work, and play.

For additional information about the project, please contact MSD Engineering Customer Service at (513) 557-3594 or MSD.Communications@cincinnati-oh.gov or visit www.projectgroundwork.org/westfork.
