ABOUT BCL ENTERPRISE

Established in 1993, BCL Enterprise is a woman-owned design/build firm that specializes in Information and Communication Technology (ICT) Systems. From server and cable design, to wireless and cellular networks, BCL designs and installs everything needed to support your computer, audio-visual, security and telecom system needs, the “magic behind the walls.” The wide range of BCL’s services encompass the full spectrum of client needs—from project inception to completion—and gives our clients a single source of responsibility for most of their facility design needs.

OUR PROCESS

All of our design-build work is vendor-neutral, meaning you have the opportunity to work with multiple vendors in your single project to pick the technology that works best for you. Our aim is to educate our clients about today’s ever-changing world of Information Technology so clients have the knowledge to make the decisions that suit them best and will work for years to come.

MINORITY / DISADVANTAGED CERTIFICATIONS

BCL Enterprise is Ohio DAS EDGE Certified, WBE Certified, MBE Certified, and DBE Certified and provides the highest level of professional ICT Design.

NAICS Codes: 238210 - 238120 - 541690 - 541990

RECOGNIZED SUCCESS

For the past 30 years, BCL has responded promptly and efficiently to client needs with quality services and innovative, practical design solutions. 90% of our work is related to past clients, a testimony to our reputation and service. It is our policy to ensure that all projects receive 100% hands-on involvement from principal staff members during all phases. Direct principal commitment is the foundation of our success.
